**Re: Docket No. 12-BSTD-1 Response to CBIA Comments posted March 28, 2012**

Dear Commissioner Douglas,

Southern California Edison (SCE) is proud to support the California Energy Commission's efforts to continually improve the California Building Energy Code to cost-effectively reduce energy consumption Statewide and save consumers billions of dollars in electricity costs.

By providing the California Energy Commission with accurate, reliable, and proven technical documentation through its Codes and Standards Program, SCE seeks to inform and support the building energy code adoption process. SCE is dedicated to work collaboratively with its utility counterparts, the California Building Industry Association, and other key stakeholders to identify economically viable technologies and building practices that promote increased energy efficiency.

If you have any questions, please give me a call at (916) 441-2369.

Sincerely,

  
Manuel Alvarez
